Thanks Jody. I don't have a meeting on my calendar for tomorrow, but will be on leave anyway, so no need to worry about me. I think Phil gave some general feedback to Chris and Scott regarding the NEPA material, as far as how to characterize some details during the briefing. Hope the briefing goes well.

Thanks,

Molly

Hi Molly,

The context as I understand it is that OAR reached out to us and requested the briefing on Air Quality issues in the Uinta Basin. I think they're trying to more fully understand why a FIP is necessary at this time. They sent an outline that included NEPA. I believe Scott and Phil worked with Chris R. on the NEPA slides. Yesterday's meeting was to discuss the content and order of the slides, and who was going to present what.

I have a note to myself to open the phone line tomorrow morning so you can participate.

Thanks,

Jody

Hi Jody – I took a look at the ppt and shared my feedback with Phil. Not having been at the briefing and therefore not completely sure of the context, I didn't feel prepared to provide specific edits. If Phil agrees with my thoughts, he may pass them along.

Thanks,

Molly

Subject: Apologies!

Hi Molly,

I am sorry, I forgot to open up the line so you could join our pre-brief this morning. Things were confused this morning as I realized that no one received the meeting update and ppt that I sent out on Friday. I am re-working the ppt and will send it out this afternoon. Please call me if you have any suggested changes.

Thanks,

Jody
